

EasyColorKey

EasyColorKey is a simple tool to pick up a picture or video from green or black background..

- Just one shader
- Easy to use

Demo:

Shader

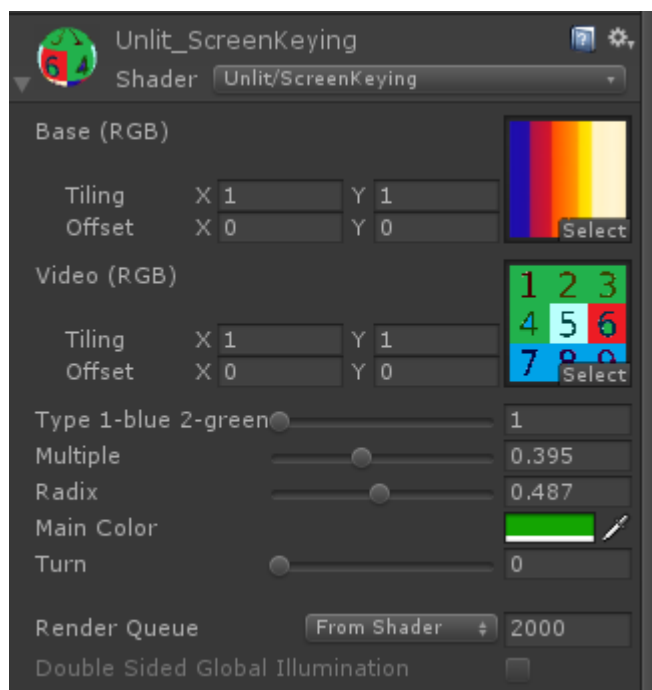

Base: Background you want to show. It can be a movie texture, tex2d or “_MainTex” property.

Video: This is what you want to pick up from key color, blue or green. Also can be a mt, tex, “_VideoTex” property.

Type 1-blue 2-green:If video's key color is green,choice value 2.If is blue,choice 1.

Multiploe & Radix:Just use these slider,,make the video clear.

MainColor:Use this color picker on the background of video,this will help you pick the key color of video.
